TRADE

S

MARK

To Our Patrons

OUR past year's business has proven that the popularity of "Mayhew's Tools" is continually increasing. Quality, finish and prompt shipments, together with reasonable prices, have done it.

We thank our old friends for their past favors and hope to merit a continuance of their patronage.

To our new friends, we wish to say that our Trade Marks

"H. H. M. CO." "M^{AYHEW'S}_{ONARCH}" and "MAYHEW" on goods of our manufacture are your guarantees. Any found defective will be replaced.

Cable address, "MAYHEWCO."

"A B C" 4th edition, and "Western Union" Codes used.

A private code word, following each tool, will be found of assistance to both foreign and domestic buyers when ordering by wire.

H. H. MAYHEW COMPANY

The Goodell Patent Brace Screw Driver

No. G 70

This is the most complete tool for putting all kinds of screws into wood and iron, and is very useful to all classes of mechanics.

It has a six-inch steel sweep, cocobolo head and handle, with patent adjustable steel collar, and a chuck for holding the interchangeable blades, which is strong and quickly operated.

It is provided with four blades from 4 to 12 inches long, made from the best tool steel, carefully tempered. Also has a 12-inch extension, which, in combination with the blades, gives a variety of 4, 8, 12, 16, 20 and 24 inches in length. The whole tool is nicely finished and nickel plated.

No. 1 Brace with Extension and 4 Blades, (BARGAIN) Per dozen
\$21 00

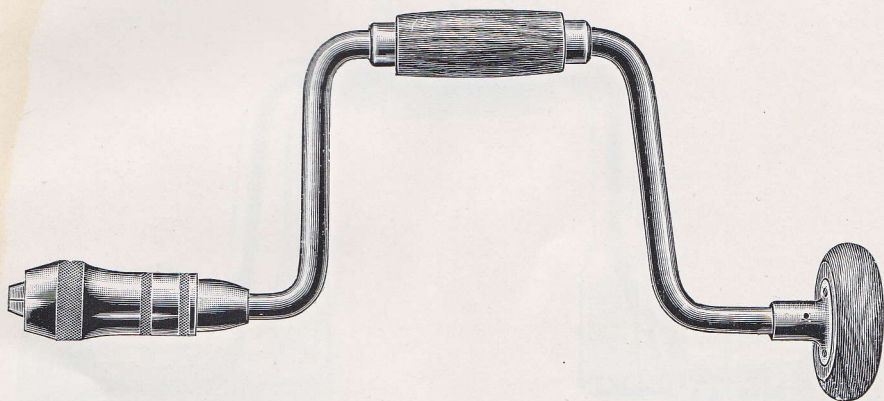

PACKED ONE SET IN A BOX

SHELBURNE FALLS, MASS., U. S. A.

The Goodell Improved Brace

Patented Dec. 27, 1892.

No. G 85

Forged Steel Jaws, Malleable Iron Socket and Shell, Cocobolo Handle and Lignum-Vitæ Head, Full Polished and Nickel Plated.

The centers on which the handle runs are adjustable steel collars which may be moved at will by loosening the set-screws holding them, thus allowing for wear.

When not in use the jaws are constantly in position to receive a bit. They will not fall together.

			Per dozen
14 inch sweep,	.	(BECKON)	\$33 00

H. H. MAYHEW COMPANY

The Goodell Improved Ratchet Brace

Patented Dec. 27, 1892.

No. G 80

Recent improvements in design of the ratchet has added value and simplicity to this Brace. The pawls are stronger and more positive in action. The pawl opener is constructed of one piece of steel. The head ball bearings being entirely within the quill are dust proof.

When desired are made with ball-bearing chucks or handles, or both. Prices on application.

			Per dozen
14 inch sweep,	.	(BILLOW)	\$42 00

The Goodell-Hay Ratchet Brace

WITH QUICK ACTING CHUCK

Goodell Patent, Dec. 27, 1892.

Hay Patent, Sept. 18, 1894.

No. G 90

This brace is identical with No. G 80 in construction with one exception. It is fitted with Mr. Hay's Quick Action Chuck. One-half turn, and a slight upward motion of the chuck opens jaws wide enough for any bit shank to enter. A slight downward pull and one-half turn sets the chuck so it is impossible to loosen the bit, by usage.

Warranted in every respect.

			Per dozen
14 inch sweep,	.	(BONUS)	\$45 00

PACKED ONE-THIRD DOZEN IN A BOX

H. H. MAYHEW COMPANY

The Goodell Improved Glass Cutters

Patented March 31, 1896.

WITH TURRET HEADS

It is our purpose in offering these tools to provide a more perfect and durable, as well as more convenient, Glass Cutter than has heretofore been placed on the market.

We call especial attention to the novel feature of the No. 1 and No. 2, lying in the turret-like holder for the six cutters which may be revolved on, or clamped to, the frame by the screw at the center. This arrangement enables the operator to place any of the cutters in position for use instantly, or, if desired, the TURRET may be removed, and the cutters be replaced with new in a minute's time. The TURRET is sunk within a circular recess, which protects all of the cutters not in position for use.

**The Cutters are Carefully Hardened and Ground by
Special Processes.**

Cutter Wheels, (CANDLE) per dozen, 50 cents

Every Cutter is tested by actually cutting glass before being mounted in the tool.

To complete the line we offer Double Wheel Cutters, numbers 3, 4, and 5.

ALL ARE PACKED ONE DOZEN IN A BOX

H. H. MAYHEW COMPANY

The Goodell Combined Gauge and Square

Patented Dec. 18, 1894.

Especially designed for door-hanging and mortise work though equally applicable to any work requiring a marking or double Gauge.

Made entirely of steel, highly polished and nickel plated. The spurs, thin and flat, with double cutting edges, are carefully hardened. Spur on back end of double-end bar is adjustable by means of a set-screw, for clearance, paint, and niceness of fit.

Price, per dozen, . . . (CRACKER) \$12 00
